

# User Manual

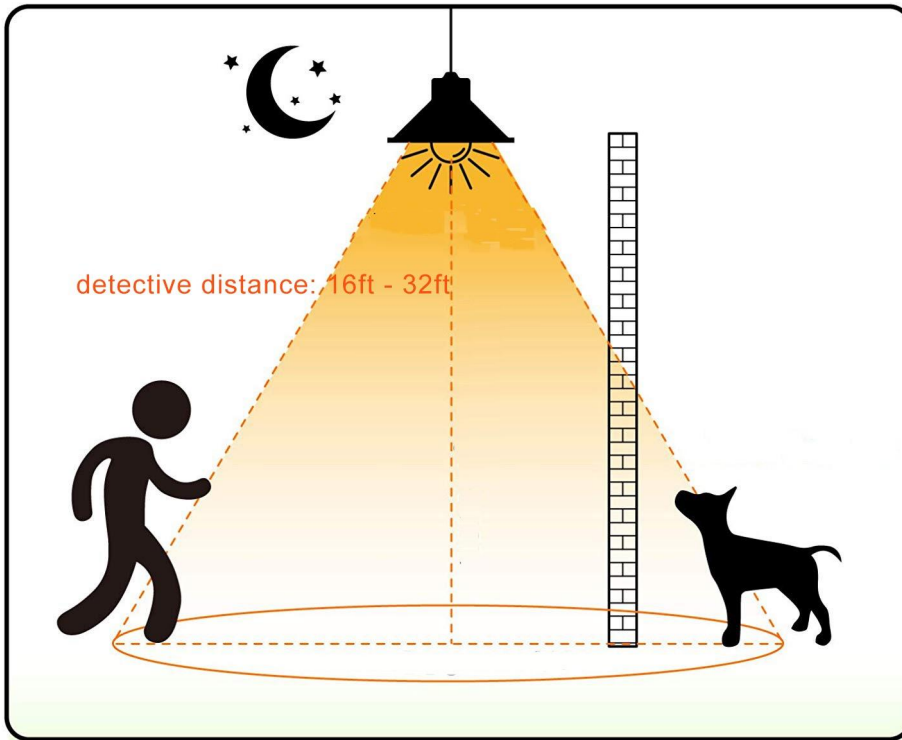

Motion sensor led bulb is widely used in corridor, hallway, porch, walkway, patio, passage, garage, stair, step, toilets, balcony, gallery, office, coffee house etc

## Installation

Simply fit the bulb into any standard E26 / E27 socket or fixture, no additional motion detection fixture required.

## How It Works

### Penetrate the walls

The radar wave can penetrate glass and walls to detect motion.

## WARNING

- \* Double insulation.
- \* Suitable for use in damp location.
- \* Do not use the bulb with dimmers.
- \* Not for use in totally enclosed luminaires.
- \* Discontinue use if damaged.
- \* Please do not disjoint or modify the bulb for any purpose.
- \* Turn power off before installation or removal the led bulb.
- \* Please check the voltage before install the bulb, make sure voltage is match with lamp bulb input voltage.

## Friendly Tips

-If the bulb turns on for around 20 seconds and then turns off, this is normal wake-up procedure at first time use, not quality problem, after that, bulb will work well as how it works.

## WARRANTY AND SERVICE

12 months money back and 36 months warranty.
